AUTHOR INDEX

Beer, P.D., 131
Benkstein, K.D., 201
Bolletta, F., 59

Cadman, J., 131

de Silva, A.P., 41

Fabbrizzi, L., 85
Fox, D.B., 41

Hupp, J.T., 201
Huxley, A.J.M., 41

Keefe, M.H., 201

Leray, I., 3
Licchelli, M., 85

Montalti, M., 59
Moody, T.S., 41

Parker, D., 109
Prodi, L., 59

Rabaioli, G., 85
Robertson, A., 157

Shinkai, S., 157

Taglietti, A., 85

Valeur, B., 3

Zaccheroni, N., 59

PII: S0010-8545(00)00380-5

COORDINATION CHEMISTRY REVIEWS, VOL. 205 (2000)

SUBJECT INDEX

Allosterism
  Cooperative binding in selective sensors, catalysts and actuators 157
Amino acids
  Combining luminescence, coordination and electron transfer for signalling purposes 41
  The design of luminescent sensors for anions and ionisable analytes 85
Anion recognition
  The design of luminescent sensors for anions and ionisable analytes 85

Catalysis
  Cooperative binding in selective sensors, catalysts and actuators 157
Cation recognition
  Design principles of fluorescent molecular sensors for cation recognition 3
Chemoresponsive
  Luminescent sensor molecules based on coordinated metals: a review of recent developments 201
Chemosensors
  Luminescent chemosensors for transition metal ions 59
Cooperativity
  Cooperative binding in selective sensors, catalysts and actuators 157
Coordinated metals
  Luminescent sensor molecules based on coordinated metals: a review of recent developments 201
Crown ethers
  Combining luminescence, coordination and electron transfer for signalling purposes 41
Cryptands
  Combining luminescence, coordination and electron transfer for signalling purposes 41

Electrochemistry
  Electrochemical and optical sensing of anions by transition metal based receptors 131
Electron transfer
  The design of luminescent sensors for anions and ionisable analytes 85
Excimers
  Design principles of fluorescent molecular sensors for cation recognition 3

Fluorescence
  Electrochemical and optical sensing of anions by transition metal based receptors 131
Fluorescent
  Combining luminescence, coordination and electron transfer for signalling purposes 41
Fluorescent molecular sensors
  Design principles of fluorescent molecular sensors for cation recognition 3
Fluorescent sensors
  The design of luminescent sensors for anions and ionisable analytes 85

Hydrogencarbonate
  Luminescent lanthanide sensors for pH, pO_2 and selected anions 109

Lanthanides
  Luminescent lanthanide sensors for pH, pO_2 and selected anions 109
Luminescence
  Luminescent chemosensors for transition metal ions 59
  Luminescent lanthanide sensors for pH, pO_2 and selected anions 109
Luminescent
  Combining luminescence, coordination and electron transfer for signalling purposes 41

PII: S0010-8545(00)00381-7

Luminescent sensor molecules
  Luminescent sensor molecules based on coordinated metals: a review of recent developments 201

Molecular recognition
  Luminescent chemosensors for transition metal ions 59
Molecular-recognition
  Cooperative binding in selective sensors, catalysts and actuators 157

Optodes
  Luminescent chemosensors for transition metal ions 59

pH
  Luminescent lanthanide sensors for pH, pO_2 and selected anions 109
Photoinduced charge transfer
  Design principles of fluorescent molecular sensors for cation recognition 3
Photoinduced electron transfer
  Design principles of fluorescent molecular sensors for cation recognition 3
Polypyridyls
  Combining luminescence, coordination and electron transfer for signalling purposes 41

Selective
  Cooperative binding in selective sensors, catalysts and actuators 157
Sensing anions
  Electrochemical and optical sensing of anions by transition metal based receptors 131
Sensor
  Cooperative binding in selective sensors, catalysts and actuators 157
Sensors
  Luminescent lanthanide sensors for pH, pO_2 and selected anions 109
Signalling
  Combining luminescence, coordination and electron transfer for signalling purposes 41

Transition metal ions
  Luminescent chemosensors for transition metal ions 59

Zinc(II) complexes
  The design of luminescent sensors for anions and ionisable analytes 85
